Job Description

Summer Intern(2 Months) We at Publicis Sapient, enable our clients to Thrive in Next and to create business value through expert strategies, customer-centric experience design, and world class product engineering. The future of business is disruptive; transformative; and becoming digital to the core; In our 20 + years in IT, never before have we seen such a dire need for transformation in every major industry; from financial services to automotive, consumer products, retail, energy, and travel. To make this transformative journey a reality in these exciting times; we seek the Rockstar's who'll - brave it out to go do the next "what will be" from "what is" - exhibit the optimism that says there is no limit to what we can achieve - deeply-skilled, bold, collaborative, flexible - reimagine the way the world works to help businesses improve the daily lives of people, and the world Our people thrive because of the belief that it's both our privilege and responsibility to usher our clients and the world into Next. Our work is fueled by - challenging boundaries, - multidisciplinary collaboration, - highly agile teams, and - the power of the newest technologies and platforms. If that's you, come talk to us! This is the world-class engineering team where you should build your career. Job Summary: The Engineering intern position will offer an opportunity to build your skills on the full stack of application development technologies in the wide variety of engineering tasks related to design, develop, analysis, test, integrate and systems engineering. Key Responsibilities: Depending on the project, you would get an exposure to some or most of the following -

- Exposure of Full stack development projects in different industry verticals - Retail, Finance, Auto, QSR, Ecommerce
- Collaborating with other teams to understand the requirements and implement them in the client product
- Conducting design and coding reviews
- Analyzing and improving efficiency, scalability, and stability of various deployed modules
- Applying latest research(software development, AI, ML, Deep Learning etc) from the world of technology to solve the business problems of our clients in real world products
- Learning
- Cutting Edge technologies, Packages, AI, Machine Learning
- Familiarity with Agile Development, DevOps, CI/CD
